

# panthera®

A unique backpack, specially designed for hanging on a wheelchair backrest.  
Many practical features. Designed and manufactured by Panthera AB.

A backpack that is specially designed for hanging on a wheelchair backrest.  
Also works great as a conventional backpack.

Several compartments and features designed to make it easy to find and access backpack contents with your hands behind your back. Special padded compartment for a 13.3" laptop (310 x 260 x 35 mm)

Reinforced in the frame and between the interior compartments for increased stability.

The shoulder straps are secured at the bottom so as not to catch in the wheels when moving. In addition, the ends of the waist straps are secured in a special compartment so as not to dangle.

Increased shoulder strap width prevents deformation of the wheelchair backrest upholstery.

Concealed compartment for catheters, discretely located at the rear of the backpack behind a zip fastener on the left side.

Concealed, easily accessible compartment, but with a design to prevent theft, behind the zip fastener at the back on the right side. For passports, wallets, etc.

Draw straps for the various compartments' zip fasteners in different configurations so that the compartments can be identified solely by touch.
